Designed for versatility

Mobility

Paediatric

Non-invasive

Invasive

Stellar is ResMed's premium non-invasive ventilator series (with invasive capabilities) for patients with changing ventilatory needs or progressive respiratory conditions, including chronic obstructive pulmonary disease (COPD), neuromuscular disease (NMD) and obesity hypoventilation syndrome (OHS).

Easy to set up and use, Stellar carefully strikes a balance between providing you with pre-programmed settings that make your job easier, and the opportunity to fine-tune settings when needed to suit each individual patient – a versatile system with its end-users in mind.

Stellar specifications

Modes	iVAPS (intelligent Volume-Assured Pressure Support) with AutoEPAP	
	ST (Spontaneous-Timed)	
	PAC (Pressure Assisted Control)	
	CPAP (Continuous Positive Airway Pressure)	
	S (Spontaneous)	
	T (Timed)	
Pressure range	IPAP: 2-40 cm H ₂ 0	
	EPAP: 2-25 cm H ₂ 0	
TiControl™	Ti Max 0.3-4 sec	
	Ti Min 0.1–Ti Max	
Respiratory Rate	5-60 bpm	
Rise Time	Min, 150–900 msec (approx.)	
Trigger and Cycle	Five sensitivity settings	
Adjustable alarms	High Leak	
	Low Minute Ventilation	
	Low and High Pressure	
	Low and High Respiratory Rate	
	Apnoea	
	Low and High FiO ₂	
	Low SpO ₂	
	Non-vented mask	
Standard fixed alarms	Circuit disconnected	
	Over pressure	
	Blocked tube	
	Internal battery empty	
Dimensions (LxWxH)	230 x 170 x 120 mm	
Weight	2.1 kg	
Air filter	Electrostatic fibre mesh	
Air outlet	22 mm taper, compatible with ISO5356-1:2004	
Internal battery	Lithium-ion, 2 hours at EPAP 5, IPAP 15, 20 bpm	
Power supply	AC 100-240V 50-60Hz,	
	2.2A AC 110V 400Hz,	
	2.2A DC 24V/3A	
IEC 60601–1 Classification	Class II (double insulation) Type BF Continuous operation	

^{*} iVAPS with AutoEPAP is only available on Stellar 150

Stellar series: the versatile choice

ResMed.com/Stellar ResMed.com/Stellar

Meeting the demands of fast-paced hospitals

Stellar 100 and Stellar 150 are packed with technologies to deliver a versatile ventilation solution, but not at the expense of easy setup and use. Taking into consideration the busy hospital environment and typical workflows, Stellar's intuitive menus simplify the setup process, while its real-time data display makes monitoring quick and always available.

Continuous monitoring at-a-glance

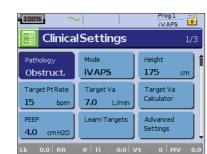

Stellar's large colour LCD screen displays essential data (such as pressure and flow curves, leak, tidal volume, SpO₂ and FiO₂) in real-time. And for even greater insight, high-resolution (25Hz) flow and pressure data is also available via the ResScan™ patient management software.

Access critical setup options quickly and easily

Critical setup options like Learn Circuit and Mask Type are now also displayed on the first clinical menu screen you see, so you can access important settings

Choose optimised settings using Pathology Defaults

A number of values are pre-set and organised by disease category to help facilitate herapy initiation. By optimising settings per condition, staff are given an accurate starting point, from which they can quickly fine-tune (if necessary) to suit the individual patient's

Delivering optimal therapy to many types of patients

Providing the modes you'd expect to see for excellent positive pressure ventilation, Stellar also includes the auto-adjusting, volumeassured mode, iVAPS, with an intelligent Backup Rate, and optional AutoEPAP feature delivering what we call IntelligentAir.*

IntelligentAir continuously monitors and automatically adjusts to deliver personalised therapy to patients with changing ventilatory needs.

intelligent Volume-Assured Pressure Support (iVAPS): Targets each patient's

intelligent Backup Rate (iBR): Provides backup breaths only when needed to give patients a chance to spontaneously trigger the ventilator.

AutoEPAP: Auto-adjusts the expiratory pressure in response to partial and full upper airway obstructions.

* iVAPS with AutoEPAP is only available on Stellar 150

Flexible therapy options

Integrated oxygen: up to 30 L/min

High pressure delivery: up to 40 cm H₂O at the mask

Extensive alarms: including FiO₂ and SpO₂ to provide added assurance for 'at risk' patients

Paediatric use: for children weighing down to as little as 13 kg

Pass-over or CounterStream[™] humidification: heated humidification with the H4i[™] or HumiCare[™] D900

Dual programs: set and save up to two programs per patient for day/night ventilation or rest/active periods

Personalised efficacy and comfort: using the following features, you can easily fine-tune settings on a patient-to-

Powered to move

NIV therapy at home.

Stellar gives patients who need extended ventilation the freedom to move – whether in hospital, at home or beyond.

Stellar has been thoughtfully engineered

to not only streamline patient setup, but

also streamline a patient's transition to

Small, lightweight and portable, Stellar is a suitable

ventilator for patients to return home with, fitting in

seamlessly with their lifestyle as they move about

Two hours capacity with an internal battery

and carry on with their daily activities.

The power of one – or two – RPS II external batteries, each providing an extra eight hours' capacity

Take it anywhere with a DC outlet with the new DC-DC converter

Custom-built mobility bag protects the ventilator when out and about
